

Junior Software Engineer

Industry 4.0 Application Development

YOU ARE HIGHLY MOTIVATED – WE HAVE AN EXCITING VISION!

KLINGELNBERG Group is one of the leading companies in the gear industry. Thanks to numerous innovations in the areas of calculation, manufacturing and measuring technology, KlingelInberg maintains a position of technology leadership in this industry.

With our Digital Unit at India, we have the vision to build a competence center which would drive the new Software development in the Industry 4.0 arena.

Our vision is to transform the manufacturing industry to a paperless industry. We are in the process of hiring such visionaries and executioners who can realize this dream to reality.

Visit <https://www.klingelInberg.com/> for more information.

Project briefing

- Development of cutting-edge client-server systems for the next-gen production environment based on state-of-the-art technologies like C#, .NET Core, Blazor, Xamarin, GRPS, REST, etc.
- Research and development of new mobile and desktop clients for innovative business models like predictive maintenance, smart machine tooling or artificial intelligence in manufacturing.

Responsibilities.

- General application development with a .NET Core stack.
- Write clean, maintainable, and efficient C# code
- Integrate with RESTful APIs, third-party services, and databases.
- Collaborate with cross-functional teams to deliver high-quality solutions.
- Participate in Code Reviews/Retrospectives/Team Meetings/Sprint Planning Meetings.
- Candidate is expected to be an extremely good Team Player.

Qualification

- Bachelor's degree in engineering

Skills

- Proficiency in coding and algorithms
- Good to have:
 - C#- .Net Core stack, REST, Frontend: Blazor, Bootstrap, MudBlazor, Android App
 - Familiarity with SQL databases like MySQL, and No-SQL databases like Mongo, Cosmos, etc

Soft Skills

- Should be an excellent problem solver with logical, clear, as well as unconventional and out-of-the-box thinking
- Excellent communication skills – Should be able to present, discuss, and communicate ideas clearly and logically in written and verbal form.
- Passion to learn, passion to explore and passion to create

How will Klingelnberg support you

- You would interact with the Solution Architect/Product Development Lead/Digital Unit head, who would guide you into your role and help you with the challenges that you will face.
- Work in a flexible and collaborative environment that encourages innovation, where your ideas are valued and can drive meaningful change in the solution.
- We make sure that you attend various Courses/Workshops/Exhibitions to enhance your knowledge about the field, which you can then bring to drive innovative product development.
